**RE: Rural America United Service Fund**

Recently, I read an online news article pertaining to 4 men being lost in the woods after a Paintball Tournament. After trying desperately to find their way out of the woods they stop and one man phone his wife and explained the dilemma. She called 911 and explained the situation that her husband and the other 3 men were in.

So, after being on the phone with 911 the State Troupers were able to locate the men through E911 services. I imagine this being a rural area which could have been a tragic event... (Thank God it wasn't. This is one reason why wireless cellular service is needed in the rural areas.

This could have been your child, my child, a family member, or a friend. I'm hoping we are being broad minded about this because cellular service is not only a conveniences service, it could be used to save lives after a car accident, if someone has been kidnapped and still have the use of their cellular service to dial 911, for a lost child, in areas where their are no land lines.

Please let's reconsider and come up with something that don't eliminate or shut-off other areas from the technology growth. The preamble states:

“We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defense, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.”

The rural areas is apart of this Great Country we called the United States of America? So, why can't the rural areas benefit from what we talk about in the **Preamble**: DOMESTIC TRANQUILITY, THE PROMOTION OF GENERAL WELFARE, POSTERITY or THE ONE I LIKE MOST “LIBERTY” (THE FREEDOMS THE REST OF US HAVE?)

**THEY DON'T MATTER????**

Let's stop having UUUHHHHHHHHH-OOOOHHHHHHH Mistakes and start coming up with solutions for all mankind to better serve a UNITED Country.
